RACING · SPEED · COMBAT · STUNT · CARRIER

DECEMBER 2017  
USA \$23.00

R/C flyers in Edmonton, Alberta, Canada decided to race some control line planes.

Instead of the usual boring racing models they built these really neat planes using  $\frac{1}{2}$  inch by 4 inch balsa and a lot of ingenuity. No report on performance but judging by the Perfect #11 tank on one model they probably fly a long time on a tank.

In this issue: Contest results, MACA Top Twenty, Super Cool Props, TCA glow plugs, a seminar for stunt judges plus a report from Howard Shenton.

Navy Carrier Society now offering free electronic membership for 2018.

Will Stewart with his Fox Speed model, Mike Hazel in the pylon flying his 21 Sport Speed, and Joey Mathison and Brad Anderson send off a Sport Jet. Brad Anderson was the recipient of the Perpetual Trophy for 2017.

Howard Doering and Ron Duly in the pylon with conventional two-line systems as Jim Rhoades heads to the pylon using a Monoline system. Pulling the thimble (in his right hand) twists the line and a control unit in the plane converts it to up/down elevator.

Chuck Rudner

Pete Athans and Bill Maywald

Jeff Rein and Don Jensen

The area behind Chuck Rudner looks pretty rough but that's way outside the perimeter. The concept of using the sprinkler system to water the field during dry periods finally sunk into the Park Department. The field (formerly known as Gopher Gulch) was in pretty good shape. Two days of warm and sunny weather with practically no wind added to the enjoyment of dozens of excellent combat matches. De-tuned F2d models on 60 foot lines seem to be favored for Speed Limit events (either cuts or kills).

It's almost winter in Southern California and it's sunny and 77F, how's it going in your area of the country? (left to right) Chuck Rudner, Don Jensen, Sean Dea, Jeff Rein, and Mike Alurac. Don Jensenator Jensen and Cary Minor are in a near dead heat for 2017 MACA #1.

Don Jensen, Ariel Quezada, and Chuck Rudner were 1-3 in Phoenix Fast F2d. (Starting from the far right) Lance Matassa ran another super triple elimination F2d contest. The winner was 2002 World Champion Mike Combat Willcox (was there any doubt?). Igor Dementiev was second, Cary Minor third, Mark Rudner fourth, and Jeff Rein fifth.

### International seminar for F2B Judge

Judges for World and European Championships received classroom and on-the-field instruction. Serge Delabarde's report follows the classroom picture.

### **International seminar for F2B Judge.**

The organizers of the World or European championships have asked me in recent years to serve as head of the jury F2B and each time, the jury FAI asked me, at the end of the competition, to check the set of scoring sheets before reading the charts. This allowed me to notice some disparities, sometimes important. At the World Championships in Australia in 2016, this problem manifested itself in qualifying flights to the point where it was necessary to refocus a judge who was officiating for the first time at this level of competition.

A few months later, participating as a pilot at an international competition abroad, I see significant differences in judgment between the three judges; did not they see the same thing?

I had the idea to propose a meeting between international judges, but also open to judges of all levels in search of perfection.

An email / invitation was sent to many European countries and beyond, and the surprise came from the interest this proposal raised. Obviously the demand was felt.

It was proposed to meet us on May 13th and 14th at the Jean Moy complex, at La Queue en Brie, the Cachan Model Club accepting stewardship. The proximity of Paris offering foreigners ease of access.

Pre-enrollments counted 20 participants from 7 countries and the course was held with 15 participants from Sweden, Belgium, Great Britain, Switzerland and France.

During 2 days, we detailed the regulation from a "power point" bilingual French / English and judged in condition the flights of 2 pilots selected for the occasion. Peter Germann, rapporteur of the category at CIAM served as mediator and did not fail to reduce any misguidance on the right path of the Sports Code or the judge's guide. Beginning and end of each maneuver, respect of the geometry, field of action of the judge, all was approached, detailed, debated.

The final round revealed the satisfaction of all participants. Today the idea is circulating and the "power point" has been distributed in several countries, hoping that our absent colleagues will continue and develop this initiative.

The combat results were just posted on-line but the results from all the other events should be available soon. If you don't know where the Canary Islands are located, take a look at Google Earth, they're just off the coast of the southern part of Morocco. Air access would probably be easiest via Madrid, Barcelona, or Lisbon.

Combat is flown using Vintage scoring but using current models with either .15 glow or diesel power. There's a 90db noise limit for glows and a speed limit of 3.5 seconds per lap. Models may be rented and a 100% refund if they're returned undamaged.

The 2018 contest will be held in mid-December, the perfect getaway for those of you living in colder climates. Here's the link to the 2017 contest:

## Fred's trivia question page.

Super Tigre G20/15v Jubilee (left) and K&B15R. Ugo Rossi won the 1960 World Championship by wrapping the lines around his right shoulder. He used a prototype of the Tigre. Which future American World Champion used a prototype of the K&B 15R?

McCollum/Knoppi, Hollfelder/Gillott, and Willoughby/Oge. Which team had the combined fastest qualifying times? Which team did the best at the World Championship?

Who was Henry Nelson's pilot? Hint: He's usually flipping props instead of piloting.
